FRANCHISE PROPOSAL

www.kleenbin.com

ABOUT US

Kleen Bin came into being in 1997 and was the first bin cleaning company in South Africa to design its own trailer-based, mobile washing facility.

After refining the mobile bin-cleaning system over the years, we're now capable of handling up to four bins at a time. Bins are washed and sanitised thoroughly, in an eco-friendly way and conveniently on the municipal rubbish collection day.

We take the hassle out of bin cleaning, offering our services to private residences and a variety of commercial operations and public institutions. We've been keeping bins fresh and germ free for more than two decades.

HOW BINS ARE CLEANED

The inside of the bin is cleaned using a high-power jet spray. Not only is the bin cleaned on the inside, it is also scrubbed on the outside. Using specialised biodegradable chemicals, we clean, disinfect, sanitise and deodorise the bin leaving it germ free, spotless and with a pleasant lemony-fresh smell. At the same time the system filters out unwanted solids and recycles the water.

WHY WE DO IT

Dirty bins are a health risk to which Kleen Bin offers the solution – an affordable and convenient bin-cleaning service which kills 99.9% of all known bacteria.

Decomposing waste is the perfect environment for bacteria and viruses to thrive.

The Covid-19 pandemic has intensified people's awareness around hygiene at your home and around the workplace.

Wheelie bins, and the areas in which they are kept, should appear on every companies' risk assessment, given the inherent health dangers associated with dirty bins.

The Kleen Bin washing and sanitisation process is a tried and trusted procedure used by Kleen Bin franchises across South Africa. The service requires no supervision and removes the health risk associated with a dirty bin at a nominal cost.

DID YOU KNOW?

Food or leftovers, even bags and cans, become toxic as they move from refrigerated to non-refrigerated environments.

Regardless of the predominant waste type, if food-related waste is not kept completely separate, cross-contamination occurs.

Paper waste, which degrades easily with moisture, becomes a breeding ground for bacteria when not completely separated from food waste.

HOW IT WORKS

At Kleen Bin, we've been keeping bins fresh and germ free for more than two decades.

UPLIFT AND EMPOWER

Our business model allow us to employ unskilled job seekers. They will receive on-the-job training to become valuable assets to your workforce. In turn, these employees are now able to support an entire extended family through receiving a regular income while uplifting their living standards.

WHAT WE OFFER

All our franchisees are provided with all the tools they need to manage and run a successful service-based business.

GUIDELINES AND MARKETING COLLATERAL

Get the support you need with thorough training and a detailed operations manual. Promotional material and fully branded uniforms will be supplied to get you started.

HARDWARE AND SOFTWARE

All our franchisees enjoy a client account management system to help them manage their business and receive basic electronic equipment to set up shop.

KLEEN BIN TRAILER, CLEANING EQUIPMENT AND CONSUMABLES

You will be up and running in no time with your own, mobile trailer system. Receive an extensive range of cleaning equipment and consumables to clean dirty bins effectively.
